--------------------------------	---

1. CjOverkill Requirements

CjOverkill versions 5.0.1 and up require the following software on your server:

- PHP 4.2 or better.
- Zend Optimizer 3.0.0 for PHP or better
- MySQL 4.0 or better

CjOverkill CAN work with PHP `safe_mode` enabled, in fact, it's recommended to have `safe_mode` enabled because it gives better overall protection to your server.

CjOverkill CAN work with PHP `register_globals` disabled, in fact, it's recommended to have `register_globals` disabled because it gives better overall protection to your server.
